

BUILDING ENERGY EFFICIENCY CERTIFICATE

BUILDING DETAILS

Building name		Certificate no.	B1981-2023/8
Owner's name	GPT WHOLESALE OFFICE FUND NO1	Current from	14/03/2023
Building address	150 Collins Street, Melbourne, VIC, 3000	Current to	30/12/2023
Net Lettable Area of the building	19,474.90 m ²	CBD assessor name	Lisa Williams
		CBD assessor no.	CBDA0271

PART 1 – NABERS ENERGY RATING

This building has achieved

4.5 – Star NABERS Energy rating **
(excluding GreenPower)

HOW DOES YOUR BUILDING COMPARE?
The highlighted building on the adjacent graph compares the NABERS Star rating of your building to other buildings that were issued a BEEC nationally in 2021.

PART 2 – TENANCY LIGHTING ENERGY EFFICIENCY ASSESSMENT

The average lighting efficiency in the assessed spaces of your building is 'Efficient'

YOUR LIGHTING	NATIONAL AVERAGE	This table shows how your building compares with other buildings that were issued a BEEC nationally in 2021. These averages are area-weighted. Individual spaces may perform better or worse than the average.
Very efficient	Very efficient	
Efficient	Efficient	
Somewhat efficient	Somewhat efficient	
Somewhat inefficient	Somewhat inefficient	
Inefficient	Inefficient	
Very inefficient	Very inefficient	

For further details on which functional spaces are the best and worst performers, please refer to the Assessment Summary section within Part 2 - Tenancy Lighting Energy Efficiency Assessment of this certificate.

PART 1 – NABERS* ENERGY RATING

BUILDING DETAILS

Building address	150 Collins Street, MELBOURNE, VIC 3000	NABERS rating no.	N66113
		Certified date	31/12/2022
		Current to	30/12/2023

NABERS ENERGY RATING

This building has achieved

4.5 – Star NABERS Energy rating **
(excluding GreenPower)

Rating scope	Base Building
Rated area	18,732.800 m ²
Rated hours	54.500

BUILDING CONSUMPTION & EMISSION DETAILS

Annual emissions	1,024,822.000 kg CO ² -e per year
Annual emissions intensity	54.707 kg CO ² -e/m ² per year
Annual consumption	5,938,297.600 MJ per year

NABERS ASSESSOR DETAILS

Assessor name	Jaafar Ahmed
Assessor number	90083

PART 2 – TENANCY LIGHTING ENERGY EFFICIENCY ASSESSMENT

ASSESSMENT SUMMARY

Building address	150 Collins Street, Melbourne, VIC, 3000
Assessment scope	All Office Space
Assessed NLA	19474.00 m ²

Assessor name	Assessor no.	Assessment no.	Version no.	Space ID	Certified date	Current to
Peter Lovett	CBDA0086	LA08037	4.1	1,2,3,4,5,6,7,8 ,9,10,11,12,13 ,14,15,16,17	17/12/2021	17/12/2026

Space ID	Functional space name	NLA (m ²)	NLPD (W/m ²)	NLPD Performance comparison	Lighting system Existing/proposed	Control capacity	Performance comment
1	Functional Space - 1 - Part Ground Floor - Suite 1 - NLA 377.1m ²	377.10	3.85	Very efficient	Existing	Good	NA
2	Functional Space - 2 - Part Ground Floor - Suite 2 - NLA 153.1m ²	153.10	6.22	Efficient	Existing	Good	NA
3	Functional Space - 3 - Part 1 st Floor - Suite 1 - NLA 516.5m ²	516.50	3.85	Very efficient	Existing	Good	NA
4	Functional Space - 4 - Part 1 st Floor - Suite 2 - NLA 365.2m ²	365.20	3.85	Very efficient	Existing	Good	NA
5	Functional Space - 5 - Part 1 st Floor - Suite 3 - NLA 405.1m ²	405.10	3.85	Very efficient	Existing	Good	NA
6	Functional Space - 6 - Part 2 nd Floor - Suite 1 - NLA 1045.5m ²	1,045.50	3.85	Very efficient	Existing	Good	NA
7	Functional Space - 7 - Part 2 nd Floor - Suite 2 - NLA 926.5m ²	926.50	19.33	Very inefficient	Existing	Good	NA
8	Functional Space - 8 - 3 rd Floor - Whole Floor - NLA 1759m ²	1,759.00	3.85	Very efficient	Existing	Good	NA
9	Functional Space - 9 - 4 th Floor - Whole Floor - NLA 1766m ²	1,766.00	3.85	Very efficient	Existing	Good	NA
10	Functional Space - 10 - 5 th Floor - Whole Floor - NLA 1520m ²	1,520.00	3.85	Very efficient	Existing	Good	NA
11	Functional Space - 11 - 6 th Floor - Whole Floor - NLA 1520m ²	1,520.00	3.85	Very efficient	Existing	Good	NA
12	Functional Space - 12 - 7 th Floor - Whole Floor - NLA 1520m ²	1,520.00	3.85	Very efficient	Existing	Good	NA

13	Functional Space - 13 - 8 th Floor - Whole Floor - NLA 1520m ²	1,520.00	3.85	Very efficient	Existing	Good	NA
14	Functional Space - 14 - 9 th Floor - Whole Floor - NLA 1520m ²	1,520.00	3.85	Very efficient	Existing	Good	NA
15	Functional Space - 15 - 10 th Floor - Whole Floor - NLA 1520m ²	1,520.00	3.85	Very efficient	Existing	Good	NA
16	Functional Space - 16 - 11 th Floor - Whole Floor - NLA 1520m ²	1,520.00	3.85	Very efficient	Existing	Good	NA
17	Functional Space - 17 - 12 th Floor - Whole Floor - NLA 1520m ²	1,520.00	NA		Existing		NA

Disclaimer: The Australian/New Zealand Standards 1680 series makes recommendations for the lighting of interiors and workplaces. This assessment makes no judgment about the performance of the installed lighting system against the recommendations of those standards. Prospective tenants or owners should check that the lighting system is fit for their requirements.

Definitions and other information on how to interpret the lighting assessments are at Attachment A

ATTACHMENT A

ENERGY EFFICIENCY GUIDANCE

Guidance on how building energy efficiency might be improved for building owners and tenants may be found at <http://cbd.gov.au/get-and-use-a-rating/how-to-improve-your-NABERS-rating>

DEFINITIONS

Definitions and other information on how to interpret the tenancy lighting energy efficiency assessments are in accordance with the CBD Tenancy Lighting Assessment for Offices Rules, available from the CBD website at www.cbd.gov.au.

Average tenancy lighting efficiency

The average tenancy lighting efficiency, as shown on the front page of the BEEC, is calculated based on an area weighted average of the Nominal Lighting Power Density (NLPD) of all of the functional spaces included on the BEEC. This means that larger functional spaces with a greater floor area will count more towards this calculation than smaller spaces. The calculated area weighted average NLPD for the building is then categorised as per the NLPD performance comparison below. Spaces which are deemed non-assessable are excluded, and where a proposed system has been assessed the proposed system NLPD is used in the calculation. The national average is an area-weighted average of the NLPD of all functional spaces listed on all BEECs issued in 2021. If a space was listed on more than one BEEC issued in 2021, only the most recent instance of that space was included in the calculation.

Nominal Lighting Power Density (NLPD)

NLPD performance comparison is divided into the following categories;

- Very efficient performance is where the NLPD is equal to or less than 4.5 W/m²
- Efficient/Excellent performance is where the NLPD is between 4.6 - 7.0 W/m²
- Somewhat efficient/Very good performance is where the NLPD is between 7.1 - 10.0 W/m²
- Somewhat inefficient/Good performance is where the NLPD is between 10.1 - 15.0 W/m²
- Inefficient/Poor performance is where the NLPD is between 15.1 - 18.0 W/m²
- Very inefficient/Very poor performance is where the NLPD is greater than or equal to 18.1 W/m²

NLPD for TLAs submitted under v3.0 & v3.1 rules is rated from 'Very poor' to 'Excellent'.

NLPD for TLAs submitted under v4.1 rules is rated from 'Very inefficient' to 'Very efficient'.

Existing Lighting System

The existing lighting system, in an owner occupied functional space, refers to the lighting that might reasonably be expected to remain immediately prior to any subsequent lease or sublease. In a

leased space, it refers to the lighting that might reasonably be expected to remain at the conclusion of the lease or sublease, disregarding the impact of any make good clause or any negotiations that may occur between the landlord and the tenant. It does not include desk mounted task lighting nor architectural or feature lighting installed by the owner, lessee or sublessee. All other lighting will generally be included. In an unoccupied functional space, it refers to the lighting that exists at the time the assessment is conducted.

Control capacity

Fully functioning lighting control systems may reduce the energy consumption of the installed lighting system by reducing the amount of time the lights are on or by reducing the operating power through dimming strategies. This assessment has identified the level of sophistication of the installed lighting controls but has not verified their functionality. Prospective tenants or owners should check the ongoing functionality of the installed lighting control system, its ability to be modified if required and whether it is fit for their requirements.

Poor - Most of the lighting within the functional space relies on manual switching to turn the lights on and off where switching zones are greater than 250m².

Moderate - At least 50% by area of the lighting within the functional space is managed by a timer/ supervisory control system that ensures that lights are turned off outside normal working hours.

OR

At least 50% by area of the lighting within the functional space is managed by a occupancy control system that ensures that lights only operate when the space is occupied, rooms are individually controlled and a general switching zones are more than 100m².

OR

The lighting within the functional space relies on manual switching to turn the lights on and off where the functional space is less than 250m².

Good - At least 50% by area of lighting within the functional space is managed by a occupancy control system that ensures that lights only operate when the space is occupied, rooms are individually controlled and general switching zones are less than 100m².

Performance comment

The performance comment describes any additional features of the lighting system that may affect its energy or functional performance.

Proposed lighting system

Proposed lighting refers to the lighting system as it may exist following either an owner/lessor proposed upgrade or resulting from a make good provision in an existing lease/sublease where the relevant work is expected to be completed within three months of the lighting assessment. Prospective buyers, lessees and sublessees should assume that the existing lighting remains in place

in the absence of specific assurances from the seller or lessor that the work to install the proposed lighting has in fact been carried out.

Reason for assessment

Scheduled upgrade - Scheduled upgrade refers to works that, at the time of the assessment, were to be carried out within three months on the lighting system in the relevant functional space by the owner.

Make good - Make good refers to works that, at the time of the assessment, were to be carried out within three months on the lighting system in the relevant functional space by the outgoing lessee or sublessee.

DISCLAIMER
